8 Integrated Solutions Across Dynamic Pricing, Broker Systems & Customer CX

PREPARED BY MEGHANA G S | STRATEGIC BI & PM OPERATIONS

S t r a t e g i c

T h e

Real estate developer margins face pressure from high financing costs. Traditional manual sales workflows, lack of competitive intelligence, and disconnected post-sale operations create substantial margin leakage.

T h e

Go-To-Market (GTM) Engineering acts as a technical force multiplier. 8 integrated digital prototypes developed to accelerate sales velocity, resolve channel conflicts, and protect price realizations under strict RERA guidelines.

P i l l a r

Tools map directly onto the five pillars of modern PropTech: Interactive Visualizer Twins, Competitor Scrapers, Dynamic Pricing, Broker Ecosystems, and Post-Sales CX.

E n t e r p r i s e

The 8 files in this suite are ready-to-run, zero-dependency assets designed to scale seamlessly into Puravankara's active corporate systems.

S o l u t i o n B u i l d e r

B u s i n e s s

Home buyers experience high emotional engagement. Static PDFs fail to demonstrate premium options or complex subvention pricing schedules.

E s t .

+20–30% digital inquiry-to-visit conversion rates. Models sales enablement tablets used daily on-site by Prestige Group and Brigade.

C o r e

Renders a high-detail interactive 3BHK vector blueprint with layer toggles for interior layouts and smart home automation node hotspots. Features a compass rotation (solar simulator) to highlight balcony sun path exposures.

C o m p l i a n t

Computes exact built-up loadings, GST (5%), Preferential Location Charges (PLC), and outputs formal downloadable Cost Sheet PDFs using jsPDF.

Suite Specification: 3BHK Grand (1,850 sqft)

3BHK Grand — 1,850 sqft (Saleable)

Preferential Location Charges (PLC):

Garden Facing (+ ₹250/sft)

Garden & Landscape Facing (+ ₹250/sqft)

Floor Level Selector:

Level 8

Car Parking Slot Selection

Standard Stilt Allocated Slot (₹4,50,000)

S o l u t i o n

B u s i n e s s

Manual competitive benchmarking is slow and labor-intensive, limiting a developer's launch pricing agility in high-velocity micro-markets.

C o r e

Python BeautifulSoup scraper parses live indices for Hebbal/Thanisandra completions. The companion SVG analytics dashboard pulls scraped JSON data to display instant comparative graphs.

P r i c i n g

Renders comparative metrics showcasing average Base Selling Price (BSP) per sqft and common loading factors across Prestige, Sobha, and Brigade.

E s t .

Achieves 100% manual labor savings and provides real-time pricing intelligence. Precedent: Actively leveraged by business intelligence divisions at Godrej Properties.

S o l u t i o n

S o l u t i o n S i m u l a t o r

B u s i n e s s

Developers routinely experience margin loss by either underpricing high-demand configurations or holding slow-moving inventory too long without price adjustments.

R e - A l i m e

Renders dynamic SVG line charts mapping cumulative cash flows, absorption velocity, and price increases simultaneously.

C o r e

Runs randomized probability parameters to model project absorption trajectories over 36-month timelines. Simulates automatic price appreciation rules (e.g. adding +₹150/sqft to BSP upon targeted unit absorption).

E s t .

+2.5–4% overall project margin improvement via automated yield management. Modeled after advanced revenue systems at Lodha (Macrotech).

DYNAMIC PRICING GTM

S o l u t i o n

S o l u t i o n

B u s i n e s s

Heavy brochures and flat 2D maps do not capture the emotional value of tower height, orientation, and floor-level view advantages.

E s t .

Delivers +40% customer dwell-time on launch landing pages.
High-end interactive standard for luxury project launches at Prestige and Sobha.

C o r e

Utilizes Three.js / WebGL to render an interactive, lightweight 3D virtual tower. Buyers can rotate the tower, hover over floors, filter layouts, and click to view 3D floor plan details.

C O - F e e

Configured to run cleanly from disk without server requirements, ensuring instant portability for sales tablets with zero local CORS limitations.

S o l u t i o n

S o l u t i o n - T i m e S y n c

B u s i n e s s

Broker networks drive up to 80% of sales volumes in Bangalore North but face high channel conflicts and double-bookings.

E s t .

+15–20% broker-sourced transaction speed. Market precedents include Anarock Astra and custom developer partner panels.

-L o c k

C o r e

Features an interactive Tower layout grid showcasing vacant, sold, and blocked units. Implements a 30-minute countdown 'Soft-Block' locker which globally locks units during client closing talks.

S e c u r e

Binds hold-locks directly to Broker RERA licenses, generating an audit transaction ledger to eliminate commission conflicts.

S o l u t i o n - F i r s t

Sales agent console translates buyer profiles (BHK interest, hooks, notes) into highly customized landing pages. Simulates outbound WhatsApp chatbot flows with active quick-reply button triggers.

B u s i n e s s

Sales follow-ups are slow and generic. Home buyers lose emotional momentum within hours after leaving a physical site visit.

I n t e r a c t i v e

Features a down-payment slider showing subvention bank splits (e.g. 10:80:10 ratios) dynamically, and adapts layout graphics matching the buyer's profile.

C o r e

Sales agent console translates buyer profiles into highly customized landing pages. Simulates outbound WhatsApp Business chatbot flows with active quick-reply button triggers.

E s t .

Drives **3x digital lead-to-booking conversions**. Precedent: Utilized by Godrej Properties and tech-led PropTech platforms.

S o l u t i o n P o r t a l

B u s i n e s s

The 3-year construction cycle is historically filled with client anxiety, and project handovers are plagued by slow, paper-based inspection snags.

C o r e

Resident portal features live progress feeds, RERA schedules, and demand note generators. Inspector portal features a point-and-click digital snagging blueprint.

I n t e r a c t i v e

Inspectors tap the SVG layout to drop snag pins (auto-resolving coordinates to room names like Master Bed/Kitchen), assign subcontractors, and track resolution statuses.

E s t .

Yields a **35% reduction in project handover cycle-times**, optimizing developer working capital. Adopters: Shapoorji Pallonji, L&T, Sobha.

Asset Handover Checklist

Once structural castings are cleared, your unit is scheduled for a physical walk-through. Digital snags marked by Quality Assurance must be resolved prior to registration signing.

Your Logged Snags:

1 Open Defect

S o l u t i o n B u i l d e r

Python engine analyzes aging records to classify stagnant units and suggest margin-protecting lifestyle/financial bundles — without brand-damaging base-price reductions.

B u s i n e s s

Unsold stagnant stock (low-floors/poor-views) incurs heavy finance carrying costs. Slashing base prices dilutes project branding.

C o r e

Python engine analyzes aging records to classify stagnant units and suggest margin-protecting lifestyle/financial bundles (furnishings, bank subventions).

L a n d i n g

Renders aging stats and provides one-click customized campaign page generation featuring pricing comparison slots, countdown timers, and RERA campaign lead forms.

E s t .

Shortens Quarters-to-Sell (QTS) cycles by 15–25%. Precedent: Practiced by advanced yield management groups at Lodha and Prestige.

Solution Builder

Enterprise -Day

Structured rollout phases across Channel Partners, Sales Enablement, and Project Handover operations to secure long-term automated yield management.

- ✓ All 8 GTM engineering solutions are modular and independently deployable — allowing Puravankara to sequence adoption by business priority, team readiness, and market timing. Solutions 1–4 (Floor Plan, Scraper, Simulator, 3D Tower) can be activated in parallel with the 90-day rollout.
