Developer Mandate Health

Balanced Scorecard

A Transparent, Client-Facing Performance Measurement Matrix to Underwrite Sales Velocity, CP Engagement, and AI-Funnel Efficiency

 Pitch Lead: **Meghana Grama Satyan (ISB Alumna & Real Estate Strategist)**

 Prepared For: **Sunil Mishra (CEO, Anarock Growth Businesses & CS&AO)**

 Focus: **Mandate Underwriting Transparency & Developer Acquisition**

Framing Developer Trust & Yield Transparency

Traditional developer dashboards track structural items (safety reports, floor plans, concrete cycles). For Anarock's developer clients, however, **unlocked margins are driven entirely by Sales Velocity, CP mobilization stability, digital Lead conversions, and CAC performance.**

This ****Mandate Performance Balanced Scorecard**** serves as our primary pitching weapon when acquiring new Tier-1 developer mandates. It provides them with absolute, real-time funnel visibility, proving how Anarock.AI tools (Genie, Astra, CP Ranker) actively compress CAC and accelerate cash collections.

Operational Objective: This scorecard demonstrates how developer mandates leverage the proprietary **Anarock.AI** suite to stabilize channel partner contributions, compress B2C lead response times, and optimize marketing spend to keep customer acquisition costs well below target caps.

AI & DIGITAL FUNNEL

1. Financial Perspective

Underwriting realizations, collections, and marketing yields

Blended Revenue Realization

≥ ₹8,700/sft

Net booking revenues divided by total sold area. Governs base price realization averages across compact, premium, and signature penthouse barbell layout mixes.

Source: SAP S/4 HANA Freq: Monthly Owner: VP Finance

Collection Efficiency

≥ 85% on demand

Percentage of demanded customer installments successfully collected on schedule, tracking collection aging flows to ensure liquidity stability.

Source: SAP FICO Modules Freq: Monthly Owner: CFO

Actual CAC vs. Budgeted Cap

≤ 2.5% GTV

Gross customer acquisition cost (digital spends + broker commissions + collateral costs) capped relative to Gross Transaction Value (GTV) of inventory closed.

Source: Marketing Ledger + Salesforce Freq: Weekly Owner: CMO

2. Customer & Brand

Perspective

Buyer engagement, site conversion metrics, and NPS brand values

Brand Net Promoter Score (NPS)

≥ 70

Strategic customer satisfaction score. Benchmarks post-sales relationship health against Oberoi (78) and Sobha (72) to underwrite premium developer credibility.

Source: Post-Interaction Survey Freq: Quarterly Owner: CX Head

Site-Visit to Booking Conversion

≥ 12%

Percentage of physical walk-in leads successfully converting into finalized bookings. Measures physical site-team closing effectiveness.

Source: Salesforce CRM Freq: Weekly Owner: VP Sales

Lead Response Time

< 5 mins

Average elapsed time from digital form submission to initial phone/WhatsApp connection by a dedicated sales strategist.

Source: CRM Activity Timestamp Freq: Real-Time Owner: Sales Lead

3. Channel Partner (CP)

Perspective

Broker database mobilization and concentration risk controls

Active CP Mobilization

≥ 200 brokers

Number of unique external brokers generating at least 1 verified customer site-visit within a rolling 30-day period, ensuring active sub-broker network pull.

Source: CP Portal Ledger Freq: Monthly Owner: VP CP Relations

Top-5% CP Sales Contribution

≤ 45%

Concentration risk indicator capping the percentage of total broker-driven sales generated by the top 5% of brokers to prevent portfolio vulnerability.

Source: Salesforce Analytics Freq: Quarterly Owner: VP CP Relations

CP Ranker Accuracy Index

AI ENGINE ≥ 90%

Match accuracy of the **CP Ranker** AI matchmaking engine, tracking whether recommended brokers match local buyer affinity metrics and close opportunities successfully.

Source: Anarock.AI Freq: Monthly Owner: Product

4. Digital Telemetry & AI

Funnel Perspective

Conversational AI effectiveness, predictive lead scoring, and automated re-engagement

Genie AI Lead Qualification Rate

AI ENGINE ≥ 85%

The percentage of incoming B2C chats successfully scored, parsed, and qualified by the **Walk-in Genie** agent before passing to human strategists.

Source: Genie Chat Logs Freq: Daily Owner: CTO

Astra Phoenix Lead Revival Rate

AI ENGINE ≥ 10%

Conversion rate of failed/cold CRM leads resurrected through automated generative WhatsApp re-outreach (Astra Phoenix) combined with n8n workflow triggers.

Source: n8n CRM Webhooks Freq: Weekly Owner: CTO

WhatsApp Conversational Engagement CSAT

≥ 4.0 / 5.0

Average user satisfaction rating returned on automated post-engagement survey tokens triggered following Genie conversational chats.

Power BI Mandate Dashboard

Specifications

The core strategic telemetry environment deployed for developer executives to underwrite lead cycles and collection efficiency in real-time.

Page 1: Executive Client Mandate Summary

EXECUTIVE

Daily Refresh Schedule
Active

Underwriting & Collection Run Chart Spec

- ✓ **Interactive Waterfall Chart:** Visualizes gross sales margins detailing barcode deductions, slab cycles, and direct digital collections.
- ✓ **Monthly Collection Trend:** Interactive bar lines showing demanded developer milestones vs. cash-inflows.

Page 2: Channel Partner (CP) Telemetry

CP RELATIONS

Real-Time Push Active

- CP Activity Map & Concentration Spec
- ✓ Broker Activity Heatmap:

Geographic map of Bangalore micro-markets plotting broker counts, walk-in contributions, and RERA compliance states.
- ✓ Lorenz Curve Graph:

Concentration curve illustrating exact GTV shares per broker registry to monitor concentration risk.

CAC Trends & Realization Splits Spec

- ✓ **Direct vs CP CAC Spline Chart:** Continuous spline mapping direct digital performance CAC against channel broker payouts over launch timeline.
- ✓ **Barbell Revenue Contribution:** Interactive tree-map plotting exact sold sqft revenues across barbell configurations (Compact value vs core premium).

Developer Mandate Data Architecture & Integration

Ensuring absolute database integrity and zero lag between developer CRM records and corporate Power BI engines.

SAP S/4 HANA FINANCIALS

Feeds blended booking collections, base price realizations, cost variances, and demanding cycles dynamically via the SAP BW connector.

Tables: GL_Actuals, AR_Aging, PO_Master

Salesforce CRM SALES FUNNEL

Pushes real-time site-visits, lead responses, physical conversions, referral tags, and direct broker lead routing records via the Salesforce REST API.

Tables: Leads, Opportunities, Bookings

Anarock.AI IoT Platform AI TELEMETRY

Aggregates Genie qualification volumes, Astra scores, post-chat CSAT feedback surveys, and Astra Phoenix n8n revival logs via Azure event streams.

Tables: Genie_Chats, Astra_Logs, Survey_CSAT

"True developer mandate strategy begins where construction dashboards end—bridging marketing telemetry and financial collections to establish absolute trust."
